# Research & Development

Always ready to be trendsetters

Our main purpose is to keep leading the way in angled systems, that is why our research and innovation in prosthetic solutions are our hallmarks.

The proximity to professional needs and the innovative philosophy of our brand allow our technical team to be at the cutting edge of the sector. When developing the product, we give priority to product output, ease of use and improvement in terms of the aesthetic result.

Research and development of new products have been our main objectives. This enabled us to create innovative projects responding to sector needs.

The result (in the shape of numerous patents presented by our R&D&I Department) has been new products launched onto the market, fruit of work done in our R&D&I department and a good working relationship with the best people and leading companies in the sector that, like Dynamic Abutment® Solutions, champion research and development.

Dynamic Abutment Solutions: always ready to be trendsetters. That is why we have started our **Production Center**: our own production center which allows us to rapidly create prototypes for new products and undertake applied research into new technologies.

The UNE-166002 certified R&D&I Centre ensures an exhaustive control of all the developmental stages for new projects. This enables these projects to turn into new products to the benefit of our clients as rapidly as possible and under the highest levels of safety and quality.

# Quality Center

Dynamic Abutment® Solutions features significant resources to ensure our clients receive products in the very best quality and safety guaranteed.

It has the latest marking, control and measurement equipment, in addition to specific features to effect physical-chemical treatments on our products .

Our presence in international markets means we have the mandatory healthcare certificates supporting our medical devices: CE marking, CMD/CAS standards and FDA certificates.

One of our primary commitments is the guarantee that the devices which we make available to our clients fully meet all healthcare regulations.

Our primary concern from the very beginning has been the quality and safety of our products: UNE-EN ISO 9001:2015 , UNE-EN ISO 13485:2016, and UNE 166002:2014

The Quality Center has an ISO-8 clean room

# International Customer Service

At Dynamic Abutment® Solutions we are very proud to offer an excellent customer service. Our aim is to establish constant communication with our international distributors and partners. We offer instant replies and solutions, answers to your queries, and provide technical advice for more complex cases.

Our international department also offers support to register our products in other countries.

Direct contact with and suggestions from our clients allow us to continuously improving the quality of the products and services we offer on a daily basis.

Participation in events, exhibitions and trainings

# Dynamic System for milling structures

more than  
100.000 cases  
resolved by  
Dynamic System

The Screwdriver set of 3.0 Dynamic Abutment® System is used in those cases in which rectification of the entry of the screw due to an unfavorable position of the implants is necessary, improving the functionality and aesthetics of the milled prosthesis.

## Dynamic Screwdriver

Screwdriver with hexalobular head, exclusively to the 3.0 Dynamic Abutment® system; lengths: 18, 24, 32mm. Our screwdriver has a contra-angle connection to make it easier to use with a dynamometer or manual ratchet, with the corresponding adaptors or handles.

## Dynamic Screws

They cover all the tread metrics available on the market. They are used with the 3.0 Dynamic Abutment®, the 3.0 Dynamic TiBase® or milled structures with an angled screw channel of up to 30°. There are several lengths for each metric to ease adaptation to the structures. All of them are made of grade 5 titanium

All screws are perfectly identified with their batch and reference numbers, which allow each and every screw to be traced and recorded in the patient's card and in the clinical or laboratory records. Only the 3.0 dynamic screwdriver must be used to fix them.

# Dynamic Tibase®

Dynamic TiBases® are a technological contribution to the digital treatment for the angled systems development using CAD/CAM: the Dynamic system includes the Dynamic TiBase®, the dynamic screw-screwdriver set, scanbodies and digital libraries available for the main CAD softwares on the market: Exocad, 3Shape, Dentalwings and EGS.

## To correct angulation up to 30°

Our grade 5 titanium bases are **gold anodized** to improve the work's aesthetic.

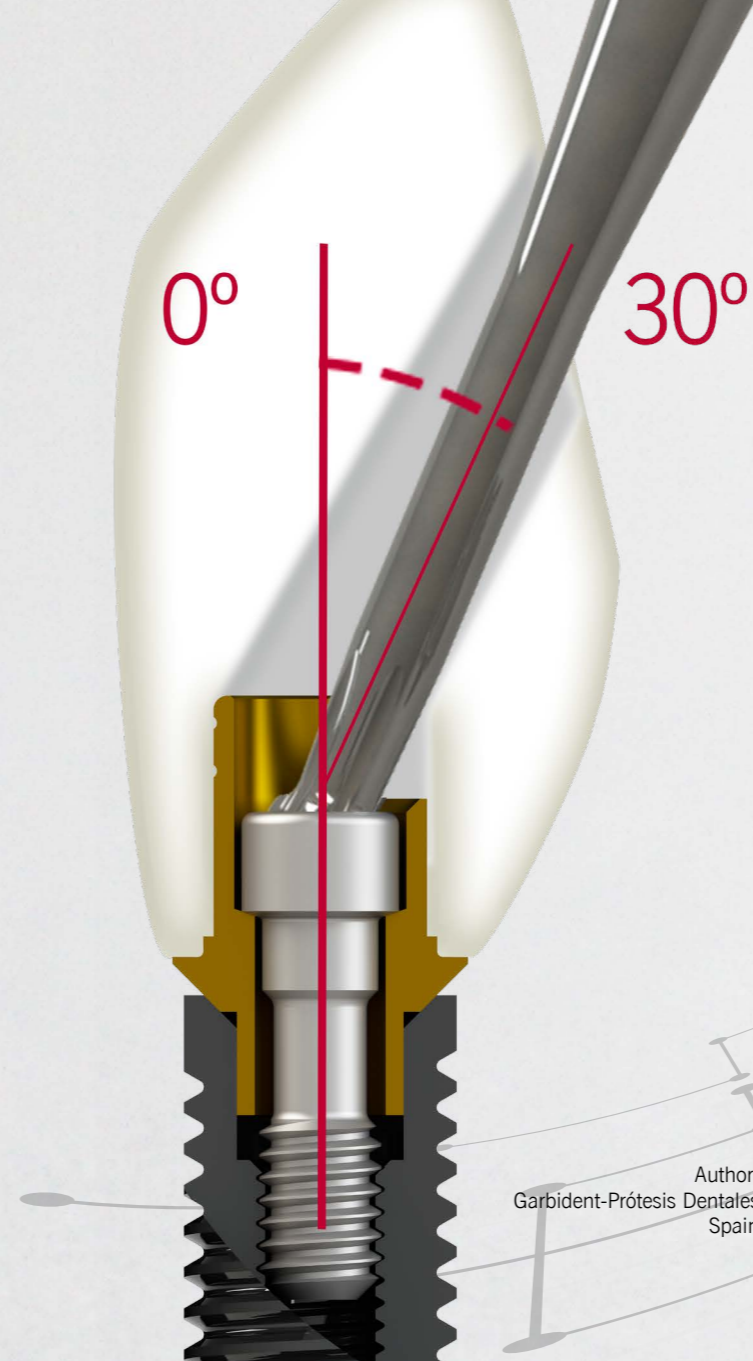

Double height with a side cut that allows the entrance of the angled screw and screwdriver.

Precision machined up to +/- 5 microns

Exterior retentions that ensure a good cement grip

Narrow platform maximum angulation 25°  
Regular/Wide platform maximum angulation 30°

More than 50.000 cases solved by TiBase®

Structure design without angulation.

Structure design with 30° angulation.

Angulation correction from 0 to 30°

# Peek Scanbody for Dynamic Tibase<sup>®</sup>

Only 5  
scanbodies  
for more than  
275 compatibilities.

# Scanning Process

Fix and adjust the scanbody to the 3.0 Dynamic TiBase®, avoiding any rotation thanks to its design.

Then, proceed with the Scanbody scanning and the position of the implant is precisely detected.

Thanks to the versatility of the 3.0 Dynamic TiBase®, extremely aesthetic restorations may be achieved through the angulation of the screw entry, which goes from 0° up to 30° using the screw and screwdriver 3.0 Dynamic Abutment® System.

## Technical Assistance

Our International Customer Service Department (Tel. + 34 973 289580) provides immediate attention for any query.

# Security & Traceability

## Security & Traceability

All of our products are **patented** and manufactured under very strict quality guidelines.

With the 3.0 Dynamic System, we provide a **card for the patient** and **labels** for the laboratory and the clinic to identify the position in which Dynamic System is located.

We exercise complete control over the traceability of our products to fulfil the current health legislation.

This helps repositioning the material and inform about the importance of using the appropriate tools when handling the Dynamic System components.

## Exclusivity

All of our products are marked during the manufacturing process to ensure the exclusivity of each piece and control traceability.

This logo is exclusive to Dynamic Abutment® Solutions and guarantees the products are original and have successfully achieved the highest quality standards in our Quality Center.

## DYNAMIC SCREWS

They cover all the thread metrics available on the market. They are used with the 3.0 Dynamic Abutment®, the 3.0 Dynamic TiBase® or milled structures with an angled screw channel of up to 30°. There are several lengths for each metric to ease adaptation to the structures. All of them are made of grade 5 titanium.

## DYNAMIC SCREWDRIVER

Screwdriver with hexalobular head, exclusively to the 3.0 Dynamic Abutment® system; lengths: 18, 24, 32mm. Our screwdriver has a contra-angle connection to make it easier to use with a dynamometer or manual ratchet, with the corresponding adaptors or handles.

HEXALOBULAR 1.70 mm  
REF: 43.618.201.01-2: PD 18mm

HEXALOBULAR 1.70 mm  
REF: 43.624.201.01-2: PD 24mm

HEXALOBULAR 1.70 mm  
REF: 43.632.201.01-2: PD 32mm

## STRAIGHT SCREWS

They cover all the thread metrics available on the market. We have several lengths for each metric to make the adaptation to the milled structures easier. Made of grade 5 Titanium.

## COMPLEMENTS

**Manual handle**  
Made of stainless steel. They are used to connect screwdriver bits with the contra-angle connection

**Large manual handle for laboratory** Ref. 49.601.000.03-2  
Ideal to manipulate models in the laboratory. Length 55.65mm.

**Manual handle for clinic**  
Ref. 49.601.000.01-2  
Clinic handle: used to position the prosthesis in the mouth prior to torque control in the clinic. Length: 15.65mm.

**Universal manual torque wrench prosthetic**  
Ref. 11.990.990.07-2  
Torque wrench. 4mm square connection. Torque 10-35N.c

**Manual torque wrench adapter prosthetic**  
Piece to connect the screwdriver with contra-angle connection to the torque wrench.

*Universal Manual torque wrench adapter*  
Ref. 49.604.000.05-2  
4mm Square connection

*Straumann Manual torque wrench adapter*  
Ref. 49.604.000.07-2  
Straumann connection

*Nobel Biocare Manual torque wrench adapter*  
Ref. 49.604.000.08-2

## ANALOGS

Stainless steel implant analog. It reproduces the implant connection

# TALLADIUM GUARANTEE

## TERMS AND CONDITIONS

These guarantee terms and conditions ("T&C") cover the entire range of Talladium products ("Products"), manufactured by TALLADIUM ESPAÑA S.L. and distributed by Geoda Medical S.L. or official dealers. The guarantee described in these T&C is exclusively in benefit of the clinician ("Clinician") and of the dental technician ("Technician") and not for the benefit of third parties or institutions, including patients.

## GUARANTEE PERIOD

TALLADIUM ESPAÑA S.L. offers a lifelong guarantee for its entire range of products starting from the date of issue of the invoice.

## GUARANTEE SCOPE

Subject to the limitations and exceptions described in these T&C, TALLADIUM ESPAÑA S.L. will offer the following benefits:

**QUALITY:** If there are defects in the materials or in the manufacturing of the Product, TALLADIUM ESPAÑA S.L. will replace the Product with no additional cost.

**SAFETY:** If, having complied with all the product indications, the prosthesis should have to be made again, due to a fault in the Dynamic Abutment® or Dynamic Titanium Base® system, TALLADIUM ESPAÑA S.L. will replace the abutments and screws necessary to remake the prosthesis, as well as the costs derived from its manufacturing.

In case of having used our products and having complied with all the product indications, the implants suffer any damage, TALLADIUM ESPAÑA S.L. will pay the cost of the implants. This coverage will only be valid during the first 6 months after the collocation of the prosthesis which includes our products.

## CLAIM REQUIREMENTS AND PROCEDURE

To receive the benefits indicated in these T&C, the treating Clinician must satisfy the following requirements:

- The claim must be notified to TALLADIUM ESPAÑA S.L. within (30) days since the date the claimed defect was detected.
- This requires that the Clinician or Technician must contact the customer service department by telephone or by e-mail to make the claim.
- A claim form will be completed, which, together with a document or report which justifies the faulty Product and the faulty Product itself, will be sent by the customer to TALLADIUM ESPAÑA S.L. offices, within the previously indicated period.
- Clinicians or Technicians presenting a claim in agreement with these T&C must be up to date in any payments owing to TALLADIUM ESPAÑA S.L. or to any of its subsidiaries, at the time when the claim form is presented.
- All the use procedures of our Products must be carried out in agreement with the instructions of TALLADIUM ESPAÑA S.L. as well as in accordance with commonly accepted dentistry practices.
- The expenses derived from this procedure will be assumed by the customer. The return shipping costs will be assumed by TALLADIUM ESPAÑA S.L. in all those cases covered by these T&C.

Regardless of the guarantee rights, claims should be notified as soon as possible in order to comply with regulatory requirements.

## GENERAL LIMITATIONS OF THIS GUARANTEE

With the exception of the guarantee described in these T&C, neither TALLADIUM ESPAÑA S.L. nor its representatives, nor third parties manufacturing or distributing the Products, represent or offer a guarantee, agreement or any other express or implicit, oral or written, commitment, with respect to the Products (without limitation), including guarantees involved in the marketing, durability or suitability for individual uses or purposes.

In addition and within the maximum extent permitted by the relative law, TALLADIUM ESPAÑA S.L. rejects (on its own behalf, and on behalf of its representatives and third parties that manufacture or distribute Products) any responsibility with respect to any direct or indirect damage caused, which may result from or be a consequence of the design, composition of the dental prosthesis into which the Products are integrated.

## GUARANTEE EXCLUSIONS

TALLADIUM ESPAÑA S.L. limits this guarantee to:

- Transformed abutments that form part of the dental prosthesis. But not the screws used to anchor them.
- Problems derived from the use of laboratory screws for the definite fixation of the prosthesis. TALLADIUM ESPAÑA S.L. has clinical screws that satisfy that function.
- Clinical screws that have been in the mouth for more than 2 years, as it is understood that the patient has to have annual check-ups with the subsequent change of screws.
- The fault is due to normal wear and tear.

## AMENDMENT OR SUSPENSION OF THE GUARANTEE

TALLADIUM ESPAÑA S.L. reserves the right to amend or withdraw these T&C at any time and without prior notification. Any modification or suspension shall not affect products already placed in patients.
