INTRODUCTION

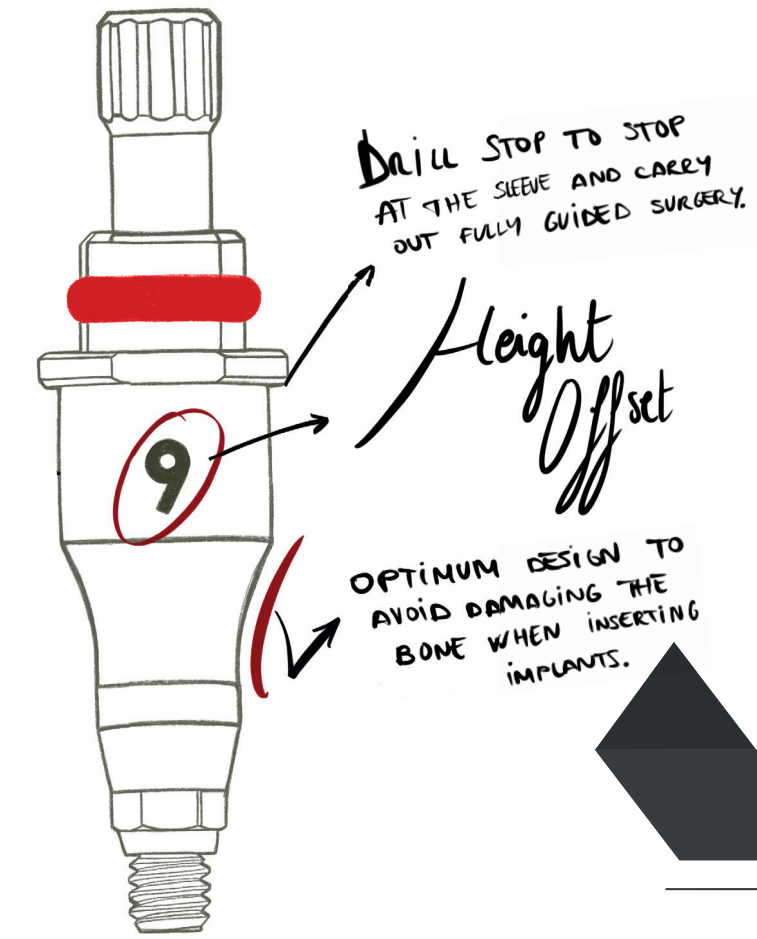

SLEEVES AND

IMPLANT MOUNT

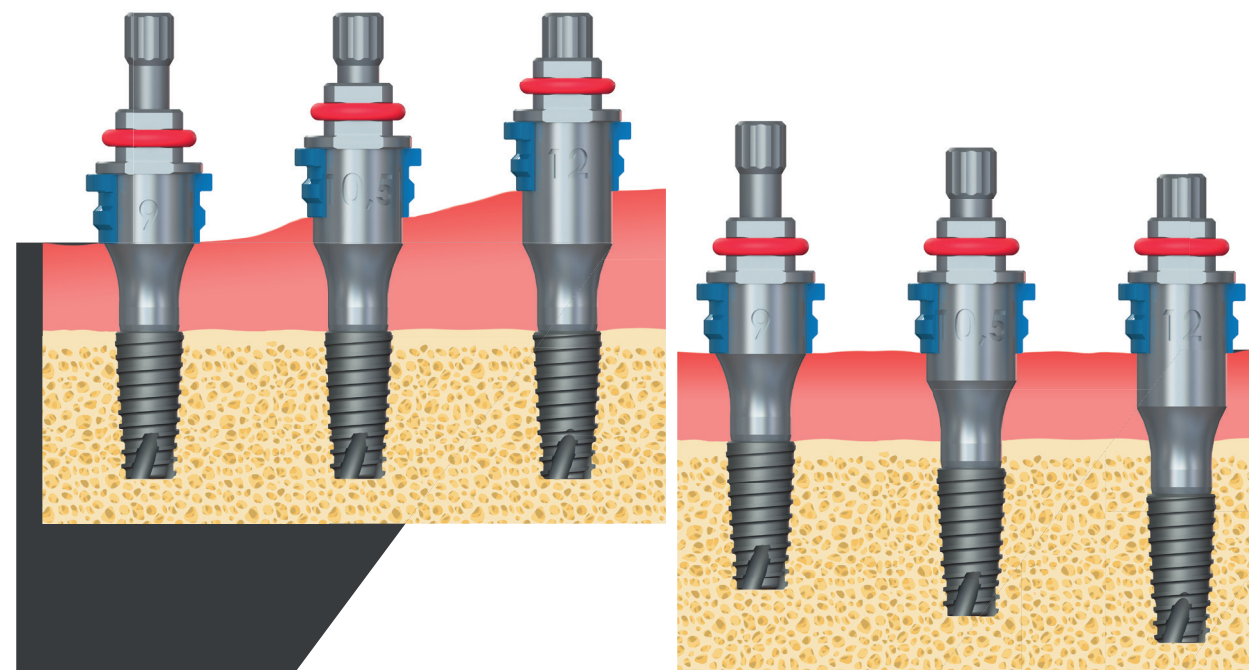

Design and development of made-to-measure sleeves for each guided surgery kit, maintaining the internal \varnothing of the original sleeve but optimising the design and modifying the library for the new sleeve or adapting it to increase precision in another sleeve and drill.

Different procedure options according to the needs of each case:

Developing products for guided surgery, improving current protocols and providing support for different products and services such as:

- ▶ Sleeves
- ▶ Guided implant mounts
- ▶ Implant, sleeve and implant mount libraries
- ▶ Offset modifications for working at bone level or below

For different compatibilities:
